

PRESS RELEASE

PRESS KIT FESPA 2017

3A Composites GmbH | Polycasa, Halle B7, Stand D40

As the market-leading supplier of sheet material, 3A Composites offers a unique variety of branded products such as Dibond, Forex, Smart-x, Kapa, Dispa and Foamalite along with the Polycasa product range. The core markets include direct-to-substrate digital printing and screen printing, exhibition, shop and furniture design, signage as well as POS/POP applications.

At this year's FESPA in Hamburg the company presents itself at the booth together with eurolaser, one of the world's leading manufacturers of CO₂ laser machines for cutting, engraving and marking. On the new laser cutter XL-1600, the different printing substrates of 3A Composites will be lasered, cut and routed in a

live demonstration on site. All lasered 3AC products have a certificate available which documents the easy and perfect laser processing.

Besides the laser live demonstration, the focus will be on the products Dispa and Banova.

DISPA®

Dispa delivers everything you would expect from a sign and display board: flat, smooth surface, excellent printability, rigidity and stability. On top comes a unique, fully recyclable design made from 100% paper. Dispa is ideal for printing, easy to shape with die and knife cutting and makes a perfect substrate for mounting or lamination using standard adhesives for maximum in-store impact.

New generation Banova: still ultra-lightweight but tougher and more flexible.

3A Composites has just extended the Banova product family by adding three new products: The first is **Banova Plus**, combining a laminated balsa wood veneer core with high quality surfaces, the next is **Banova Digital** with an enhanced surface optimised for digital and screen-printing, and finally, **Banova Superflex** a pliable and highly flexible plywood panel.

Samples as well as additional information for all product news will be available at the 3A Composites | Polycasa booth **D40, hall B7**. The booth construction per se shows with attractive graphics the versatile use of the printed and processed sheet materials - convince yourself!
